

Continuous Penetration Testing
στην εποχή του AI

Από την Ανίχνευση Ευπαθειών
στον Πραγματικό Κυβερνοκίνδυνο

ΟΜΙΛΗΤΗΣ

Σταύρος Κηρύκος

CEO & Co-Founder of
Mind The Hack

See how attackers will **actually breach you.**

And fix it, before they do.

GUARDED BY HACKERS. EMPOWERED BY AI.

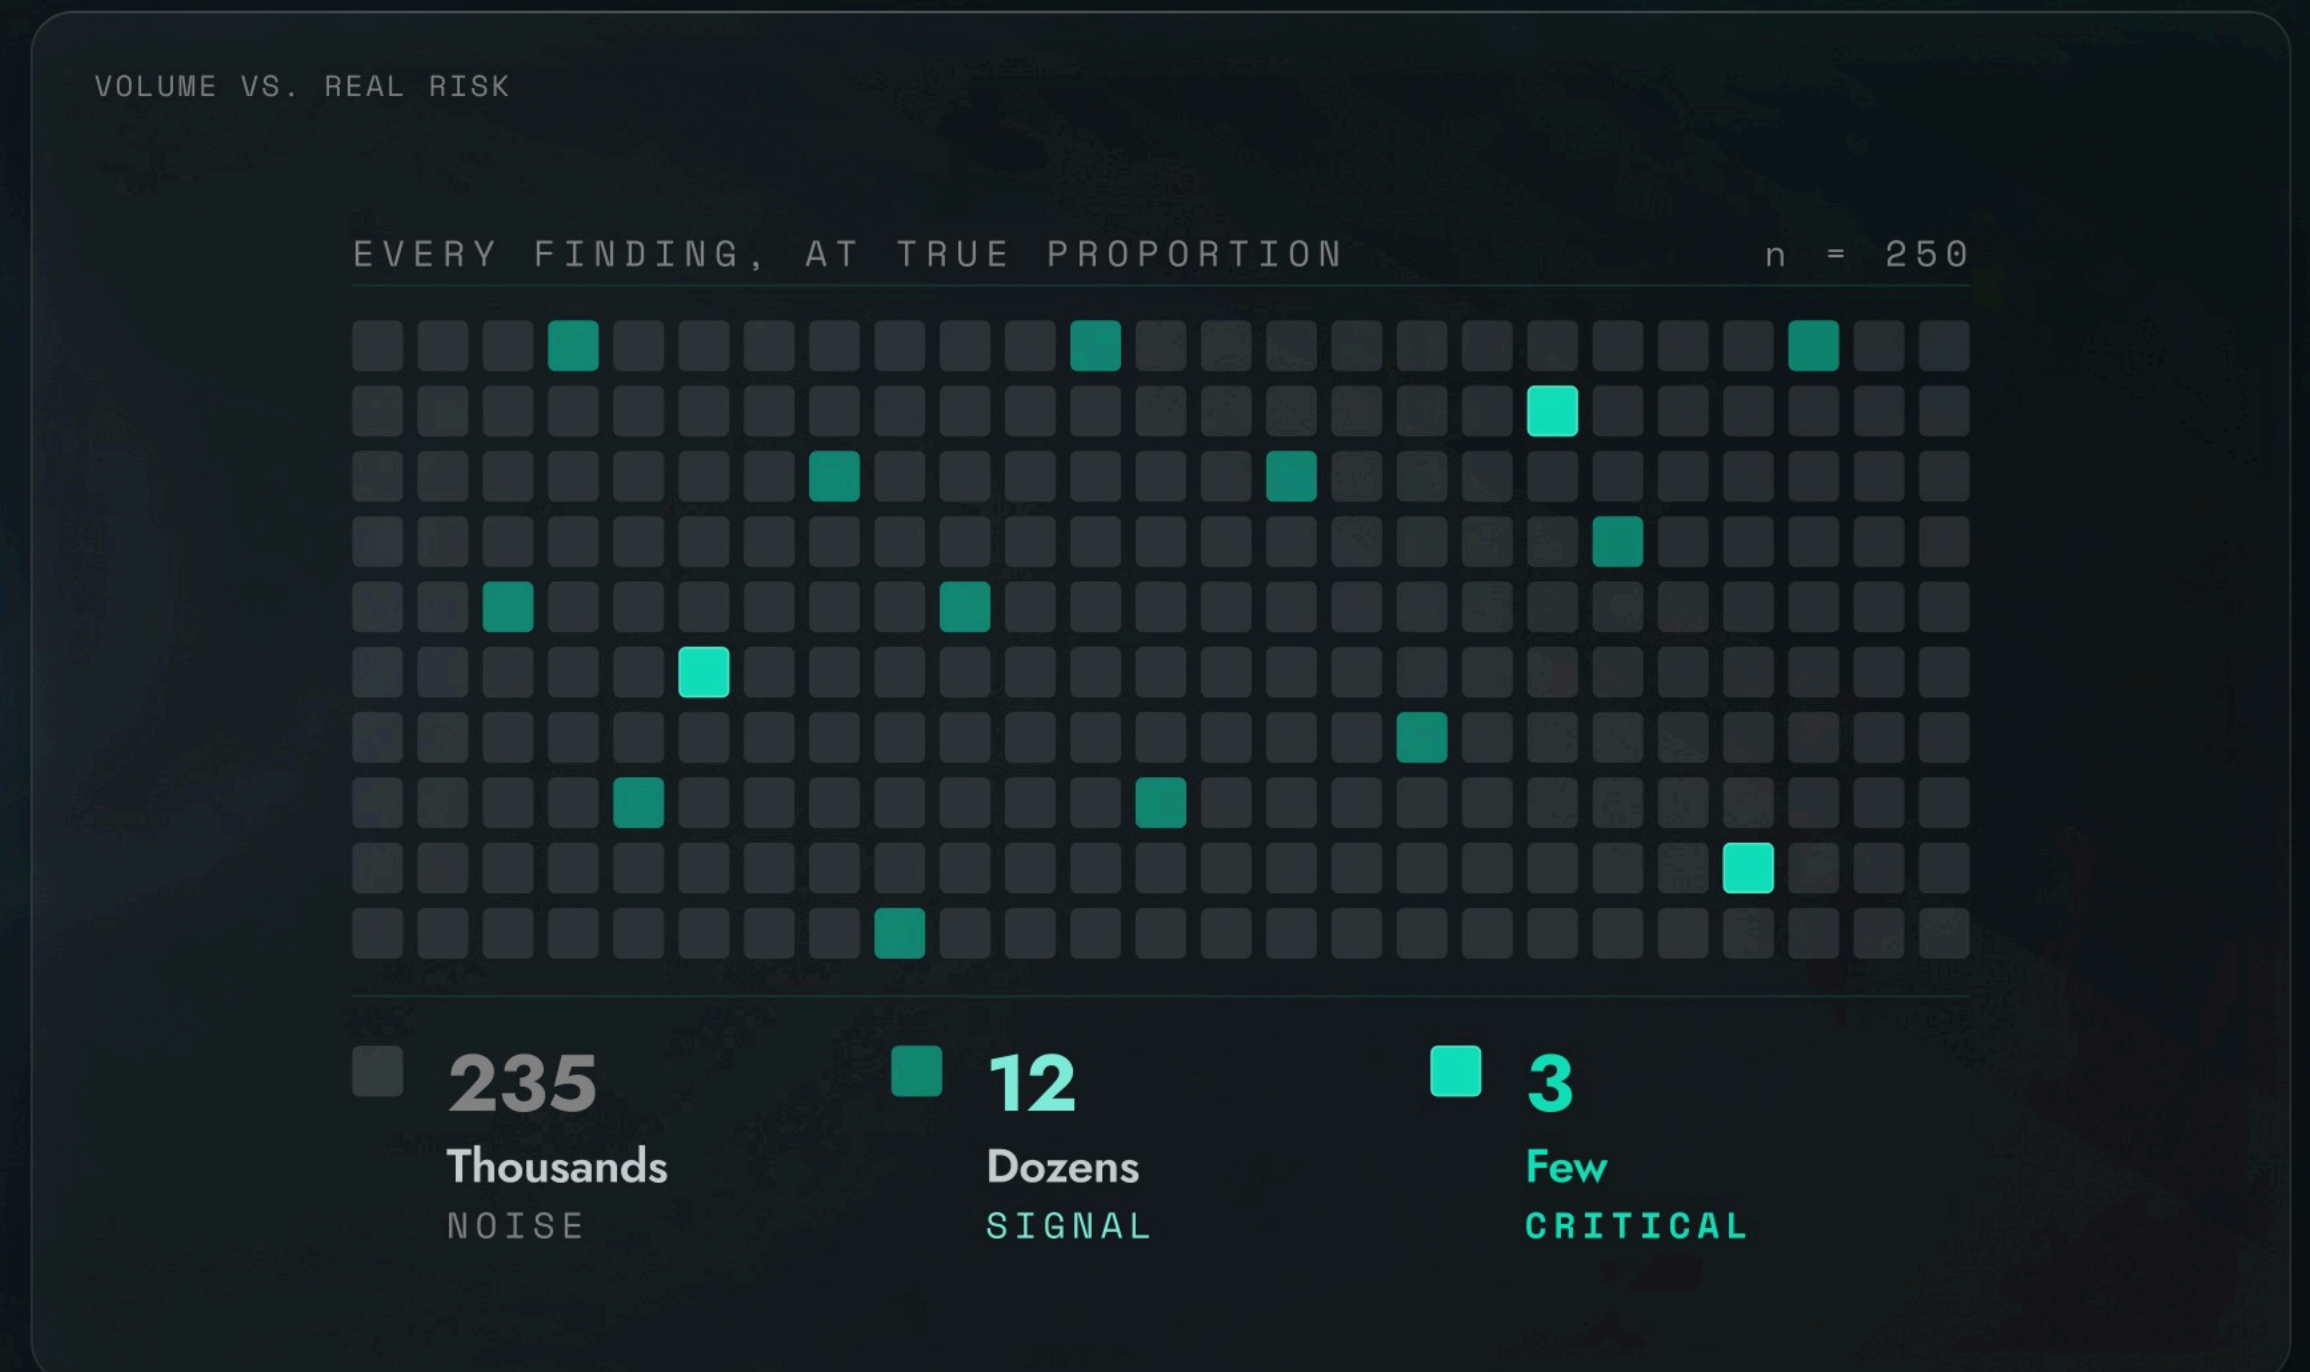

You're not lacking tools. You're lacking clarity.

Thousands of vulnerabilities.

Dozens actually exploitable.

Few that truly matter.

Attackers don't wait for your pentest report.

Exploits appear in **days**.
Testing takes **weeks**.
You're always behind.

— By the time you find it, attackers already know it.

More people **won't** fix this.

The problem isn't lack of **talent**.
It's lack of **automation** and
prioritization.

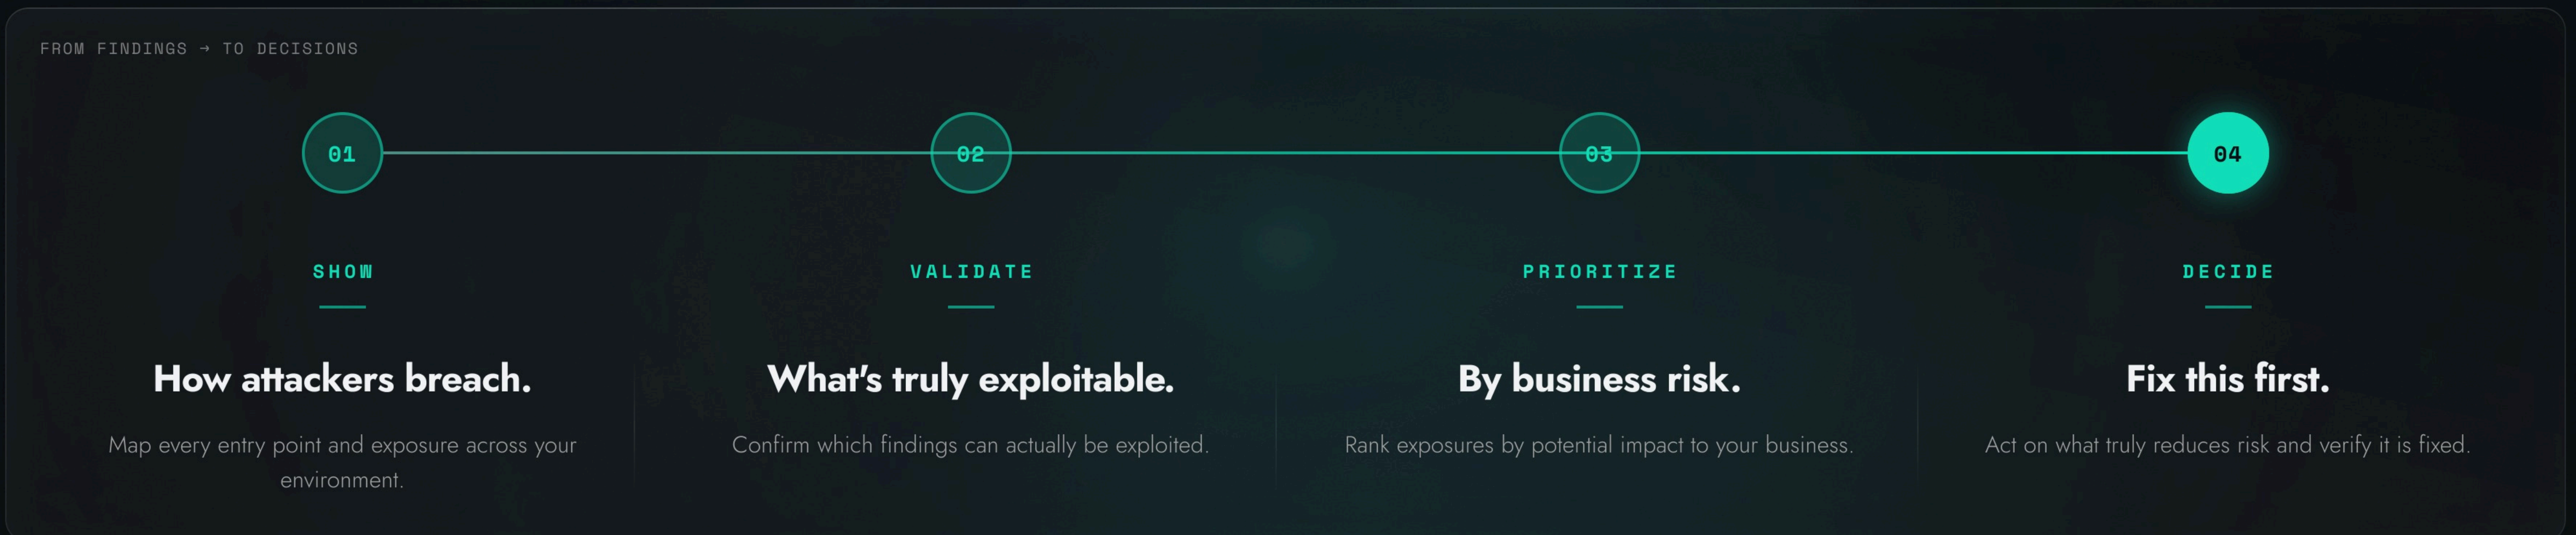

— Your team should fix issues, not chase them.

The Exposure Decision Platform.

Show how attackers actually breach. Validate what's truly exploitable. **Tell you what to fix first.**

CONTINUOUS SCANNING

EXPLOIT VALIDATED

AI-POWERED

REAL-TIME ALERTS

Six Pillars. One Platform.

From visibility. **To risk-driven decisions.**

— Not just capabilities, a complete decision system.

Trusted by organizations that can't afford wrong decisions.

IMPACT

Delivering measurable security outcomes.

- ↙ Time to validate real risk
- ↙ Noise from non-exploitable findings
- ↗ Remediation speed
- ↗ Continuous visibility

UP TO
90% faster risk validation ↙

UP TO
95% less non-actionable noise ↙

UP TO
3x faster remediation prioritization ↗

* Indicative improvement vs. traditional vulnerability management and manual validation workflows. Results may vary by environment, scope, and remediation maturity.

Who We Are

European cybersecurity technology.

MindTheHack is building a unified **Cyber Exposure Platform** that helps organizations continuously validate real-world cyber risk and prioritize what to fix first.

• AT A GLANCE

Founded in 2023

Built as a European cybersecurity technology company.

European-built platform

Designed for trust, control and European data residency.

Critical-sector experience

Trusted by organizations in telecom, finance, energy, public sector, technology and critical infrastructure.

Offensive security DNA

Built by cybersecurity professionals, ethical hackers, security researchers and software engineers.

Recognized innovation company

Active in European cybersecurity and startup ecosystems, with industry awards and distinctions.

• ISO 27001 certified

• EU-hosted

• EU-registered trademark

See how you'll **get breached,** before it happens.

No assumptions. No noise. Just real attack paths.
